**Targeted Music
Session**

**The Hive Youth
Centre Exmouth**

A music session...
with a difference, a dedicated session
especially for young people in challenging
circumstances.

Closed Session

Booking Required

We will be available for 3 x 2 hour slots from afternoon to evening, please use the details contained in this leaflet to book your time slot, we can work with individuals or small groups. In order to ensure that your young people feel safe we cannot have people 'dropping in'.

Any skill level

We can give your young people a first taste of music or, if they are already skilled, we can help them shape their music and record it. Non-Musical first timers are welcome!

Volunteering opportunities

The Collective, and the youth service, love to offer young people the chance to develop their skills by leading music workshops. If you think that you have someone who would like this opportunity then please get in touch.

How it works:

The Hive Youth Centre is our project's new base in Exmouth; we have been funded by Youth Music as part of Daisi's **Soundwaves** project to test a new way of working that will compliment our other methods.

We have years of experience working with young people in challenging circumstances and pride ourselves on remaining really informal and approachable while all the while pushing the young people on to try new things and develop their skills, accreditation can be offered if required.

We will camp out at the youth centre with all the latest music tech, using our teenage peer educators to generate a fun environment.

You contact us whenever you have a young person in your organization or unit that you think would benefit from a vibrant, safe environment to meet other young people and learn or share their musical interests for a couple of hours.

This is a DCC Devon Youth Service project and as such all staff are professionally trained youth workers and CRB'd. For more details or to discuss a referral please contact:
