

Electronic Digital Music Creation

Overview of the session

Ever wondered how to make a Dub-Step or dance track? Would you like to experiment with a host of samples and beats to make sounds and a backing track? Well this workshop opens up the world of digital music creation on software platforms such as cubase, Reason, Ableton, Logic Pro & Reaktor. Working on midi keyboards and pre-set samples, or you can draw in your own midi sounds.

We offer a reduced price to our voluntary sector partners who work within our age range of 13-19. or for groups that work with disadvantaged young people. Please contact us for details

Equipment provided

MacBook Pro Laptop, Midi keyboards, speakers, microphones, chaos pad. All software and samples. Plus engineer and peer educators

How will it benefit my youth group?

A really fun informal session with Young People expressing themselves working in a group environment and giving them the opportunity to develop musical skills and knowledge. Participants will develop confidence and self esteem by producing and programming music to create their own tracks and express themselves musically, helping develop their awareness of digital music platforms and components. A great experience for any group who enjoy listening to dance music and want to find out the secrets behind the music

This session will generally fall into your existing opening times if you are a youth club- lasting around 2-3 hours.

Group sizes: 1-8
